

U.S. Application No. 09/490,061  
Docket No. 0905-0226P  
DUE: August 18, 2004  
Art Unit: 2172  
Page 2 of 11

**AMENDMENTS TO THE SPECIFICATION**

**IN THE SPECIFICATION:**

*Please replace the paragraph beginning on page 14, line 21 and ending on line page 15, line 4 with the following rewritten paragraph.*

If a corresponding file does not exist, an album name is assigned anew from the front panel 11. The data representing this album name, together with the directory name corresponding to this album name, is stored in the album maser table that has been recorded on the large-capacity floppy disk 23 by the large-capacity controller 7. Thus there is created an album management table managed by the directory of the new album name (step 37). If a corresponding album management table already exists on the large-capacity floppy disk 23, then the processing of step 37 ~~27~~ is skipped.
